Career Objective

Seeking a challenging role in a growth-oriented organization where analytical thinking, technical expertise, and problem-solving abilities can contribute to impactful software development and continuous innovation.

SKILLS

HTML, CSS, JS, C++, SQL, R, Node JS, Python

Problem Solving, Time Management, Adaptability, Strategic Planning

PROJECTS

To-Do List Web App
📅 Mar 2025 – Mar 2025

Designed and built a responsive and interactive web-based to-do list application using HTML, CSS, and JavaScript.

- Demonstrated ability to build a complete front-end project independently.
- The app allows users to add, delete, and mark tasks as completed, with a focus on clean UI and efficient DOM manipulation.

Interactive Web-Based Strategy Game
📅 Feb 2025 – Feb 2025

Created a browser-based game that challenges users to think strategically and make calculated moves to win.

- The game focuses on interactive play, visual feedback, and smooth user experience.
- Designed an engaging logic-based game with turn-based mechanics.
- Improved decision-making and flow control handling in interactive systems.

Laptop Recommendation System
📅 Oct 2023 – Nov 2023

Built a system that recommends suitable laptops to users based on their preferences like budget, usage type, and specifications. Focused on delivering personalized suggestions through filtered logic.

- Applied decision-making logic to match user needs with laptop options.
- Improved user experience through relevant and filtered recommendations.
- Showcased ability to work on user-driven functionality and dynamic data handling.
